Mahindra BE 6 (2026) SPORTEQ

In-Depth Buyer's Research Report

Confidential — Personal Research Compilation Version: 1.0 **Date:** September 5, 2026
Market: India (Ex-Showroom Pricing) **Scope:** SPORTEQ One -> SPORTEQ Four / Launch Edition, BaaS Program, Warranty, Ownership Economics

Table of Contents

12. [Appendix A: Glossary of Terms](#)
13. [Appendix B: Sources & Methodology](#)

1. Executive Summary

The **Mahindra BE 6** (originally unveiled as the BE 6e) is a coupe-style electric SUV built on Mahindra's dedicated born-electric **INGLO** platform. In August 2026, Mahindra relaunched the lineup as the **BE 6 SPORTEQ**, restructuring the trims (One -> Four), adding a new **70 kWh** mid-tier battery, a triple 12.3-inch "coast-to-coast" cockpit, and — most disruptively — a **Battery-as-a-Service (BaaS)** ownership model that cuts the entry price to **₹11.45 Lakh**.

1.1 Top Value Propositions

#	Value Proposition	Supporting Metric
1	Longest range in its price segment	Up to 682 km ARAI (79 kWh pack)
2	Lowest possible entry price via BaaS	₹11.45 Lakh ex-showroom (vs ₹19.45L outright) — a 41% cut in upfront cost
3	Strongest performance in segment	286 PS , 0-100 km/h in 6.7 seconds (top pack)
4	Fastest charging in segment	20% -> 80% in 20 minutes on a 140-180 kW DC charger
5	Best-in-class battery assurance	Lifetime warranty , unlimited km, for the first registered owner

1.2 Quick Facts

Attribute	Detail
Body Style	Coupe-style Electric SUV
Platform	Mahindra INGLO (born-electric)
Battery Options	59 kWh / 70 kWh / 79 kWh
Price Range (Outright)	₹19.45 Lakh – ₹26.95 Lakh (ex-showroom)
Price Range (with BaaS)	₹11.45 Lakh – ₹12.95 Lakh (One & Two only)

Attribute	Detail
Variants	SPORTEQ One, Two, Three, Three+, Four/Launch Edition, Formula E Edition
Segment Rivals	Tata Curvv EV, Hyundai Creta Electric

1.3 Who Should Consider the BE 6 SPORTEQ

- Buyers who want the **longest range and most power** in the mid-size electric SUV segment.
- Low, predictable daily commuters (~60 km/day) who want to **minimize upfront cost** via BaaS.
- Tech-forward buyers who value a large digital cockpit, AI voice assistant, and ADAS on higher trims.
- Buyers comfortable with a **relatively new platform** (2025-26) with a shorter reliability/resale track record than legacy ICE-to-EV conversions from established players.

2. Powertrain, Battery & Efficiency

The BE 6 features a rear-mounted, 3-in-1 integrated electric motor setup with performance scaling across three battery configurations.

Battery Pack	Motor Power	Torque	ARAI Range	Est. Real-World Range	Efficiency (ARAI)
59 kWh	228 bhp (170 kW)	380 Nm	548 km	400 – 450 km	~9.28 km/kWh
70 kWh	245 PS (180 kW)	380 Nm	651 km	480 – 525 km	~9.30 km/kWh
79 kWh	286 bhp (210 kW)	380 Nm	682 km	500 – 550 km	~8.63 km/kWh

Note: Torque is identical (380 Nm) across all three packs — the power difference comes from motor tuning and available battery voltage, not a different physical motor.

2.1 Key Performance Metrics

- **0-100 km/h:** 6.7 seconds (79 kWh, 286 bhp variants only — lower packs are not officially rated for this benchmark).
- **DC Fast Charging:** 140–180 kW, enabling a 20% -> 80% charge in **20 minutes**.
- **AC Home Charging:** 7.2 kW / 11.2 kW wallbox — roughly **6 to 11.5 hours** depending on battery size.
- **Portable Cable:** 3 kW, 3-pin socket compatible (see [Section 7](#)).

3. Cost Analysis: BaaS vs. Outright Purchase

Mahindra introduced the **Battery-as-a-Service (BaaS)** model to significantly lower the upfront cost of the vehicle. Under this scheme, the buyer pays only for the car shell and rents the battery on a per-kilometer usage basis.

3.1 BaaS (Battery-as-a-Service) Program

Attribute	Detail
Availability	SPORTEQ One & Two only, 59 kWh battery
Upfront Vehicle Cost (SPORTEQ One)	₹11.45 Lakh (ex-showroom)
Battery Rental Rate	₹3.75 per km (uncapped)
Minimum Monthly Payment	~₹6,750/month, assuming 60 km/day over an 8-year battery loan
Best Fit	Predictable daily runners at ~60 km/day who prioritize low upfront cost
Trade-off	Cheaper to buy by ~₹8 Lakh, but the buyer never owns the battery, which complicates resale

3.2 Outright Purchase (Without BaaS)

Attribute	Detail
Upfront Vehicle Cost (SPORTEQ One)	₹19.45 Lakh (ex-showroom)
Battery Ownership	Full ownership of the 59 kWh battery included in price
Running Cost	₹1 – ₹1.5 per km on home AC electricity — no per-km rental

3.3 BaaS vs. Outright — Decision Flow

Diagram: A decision flow showing that BaaS suits low-mileage, cost-sensitive buyers, while high-mileage or long-term owners are better served by an outright purchase because the per-km rental has no cap and battery ownership simplifies resale.

4. Warranty Details

Mahindra offers an industry-leading warranty on the high-voltage battery to reassure early adopters of the INGLO platform.

Figure 1: BaaS vs Outright decision flow

Coverage	Terms
First Registered Owner	Lifetime warranty, unlimited kilometers
Subsequent Owners (Resale)	Transfers, but capped at 10 years or 2,00,000 km , whichever comes first, from date of first registration
Standard Vehicle Warranty	3 years , unlimited mileage (separate from the battery warranty)
Extended Cover	Mahindra's SHIELD extended warranty is available as a paid add-on at purchase

Buyer Note: The lifetime battery warranty is generous, but general vehicle defects and electronics are only covered for 3 years unless SHIELD is purchased separately. Some early SPORTEQ owner reviews report post-warranty-window niggles, making SHIELD worth evaluating at the time of booking.

5. Variant-Wise Pricing & Feature Matrix

5.1 Pricing Summary (Ex-Showroom)

Variant	Battery Size	Price without BaaS	Price with BaaS
SPORTEQ One	59 kWh	₹19.45 Lakh	₹11.45 Lakh
SPORTEQ Two	59 kWh	₹20.95 Lakh	~₹12.95 Lakh
SPORTEQ Three	59 kWh	₹21.95 Lakh	N/A
SPORTEQ Three	70 kWh	₹22.95 Lakh	N/A
SPORTEQ Three Plus	70 kWh	₹23.95 Lakh	N/A
SPORTEQ Three Plus	79 kWh	₹24.95 Lakh	N/A
Formula E Edition	79 kWh	₹24.45 Lakh	N/A
SPORTEQ Four / Launch Edition	79 kWh	₹26.95 Lakh	N/A

5.2 Feature-by-Feature Breakdown

Feature / Spec	SPORTEQ One	SPORTEQ Two	SPORTEQ Three	SPORTEQ Three+	SPORTEQ Four (Flagship)
Battery	59 kWh	59 kWh	59 kWh, 70 kWh	70 kWh, 79 kWh	79 kWh
Options					
Power	228 bhp	228 bhp	228 bhp (59)	245 PS (70) /	286 bhp
Output			/ 245 PS (70)	286 bhp (79)	
ARAI Range	548 km	548 km	548 – 651 km	651 – 682 km	682 km
BaaS	Yes, from Rs	Yes, from	No	No	No
Eligibility	11.45L	~Rs 12.95L			

Feature / Spec	SPORTEQ One	SPORTEQ Two	SPORTEQ Three	SPORTEQ Three+	SPORTEQ Four (Flagship)
Display / Cockpit	Dual 12.3" screens	Triple-screen (coast-to-coast)	Triple-screen	Triple-screen	Triple-screen
Processing Power	Standard	Standard	Standard	Standard	Snapdragon 8295
Camera & Parking	Reverse camera	540° camera + front sensors	540° camera + front sensors	540° camera + front sensors	540° camera + front sensors
Safety / TPMS	6 airbags, ESP, EPB	+ Individual TPMS	Individual TPMS	Individual TPMS	Individual TPMS
Driver Assistance	Basic cruise control	Basic cruise control	Basic cruise control	Level 2 ADAS + auto regen	Level 2 ADAS + auto regen
Seating & Comfort	Manual seats	Manual seats	6-way power driver seat w/ memory	6-way power driver seat w/ memory	6-way power driver seat w/ memory
Climate Control	Standard AC	Standard AC	Ventilated front seats	Ventilated front seats	Ventilated front seats
Special Tech	Drive modes, Drift mode	Manual drive video recording	Manual drive video recording	Manual drive video recording	Augmented Reality HUD

5.3 Key Takeaways

1. **The Sweet Spot:** SPORTEQ Two is the best value for tech-focused buyers on a budget — it adds the triple-screen dashboard and 540° camera while remaining BaaS-eligible.
2. **The Comfort Pick:** SPORTEQ Three is the first trim with ventilated seats and a powered driver's seat.
3. **The Tech Flagship:** Level 2 ADAS requires stepping up to Three+; only the Four has the Snapdragon 8295 chip and AR HUD.

6. Additional Highlights

Attribute	Value
Dimensions (L x W x H)	4,371 mm x 1,907 mm x 1,627 mm
Wheelbase	2,775 mm
Boot Space	455 litres
Cockpit	"Coast-to-coast" three-screen digital cockpit (from SPORTEQ Two)
AI Assistant	TEQ_Talk, powered by Google Gemini (part of the "TEQ Suites")

Attribute	Value
Suspension	Semi-active (Frequency Selective Damping) and drive modes on higher trims

7. Charging on Long-Distance Journeys

A common buyer question: “Can I carry a charger for a road trip?” The honest answer is **partially**.

- **Portable AC cable (carriable):** BE 6 ships with a 3 kW portable charging cable for any standard 3-pin 15A socket. It fits in the boot but only adds **~25-30 km of range per hour** — suitable for an overnight top-up, not a mid-journey stop.
- **DC fast charger (not carriable):** The 140-180 kW units that deliver the 20-minute top-up are large stationary installations requiring a 3-phase high-voltage grid connection and active cooling. There is no portable equivalent.
- **No practical “power bank” option:** A portable pack large enough to meaningfully extend a 59-79 kWh battery would be nearly as big, heavy, and expensive as the car’s own battery — no such consumer product exists.
- **Recommended approach:** Plan routes around fixed DC fast-charging stations (Mahindra’s own network, Statiq, Tata Power EZ Charge, Zeon, ChargeZone) and treat the portable cable as a backup only. India’s highway fast-charging network is expanding but still patchy in 2026.
- **Emerging safety net:** On-demand mobile EV charging vans (e.g. Tata.ev + Hopcharge in the NCR) are appearing in some metro regions for roadside emergencies, but this is not yet nationwide.

8. Pros & Cons Analysis

Category	Pros	Cons
Range & Battery	Longest ARAI range in segment (548–683 km); lifetime battery warranty for first owner	Real-world highway/high-speed range drops noticeably below ARAI figures per independent owner reviews
Performance	Most powerful motor in segment (up to 286 PS); 0-100 in 6.7s on top variant; strong low-end torque (380 Nm across all packs)	Firm suspension tuned for handling gives a stiffer ride than rivals like Creta Electric or Curvv EV

Category	Pros	Cons
Pricing & BaaS	BaaS cuts upfront cost by ~₹8 Lakh for predictable low-mileage buyers	Uncapped ₹3.75/km rental + ~₹6,750/month minimum tied to an 8-year loan; costs more over time for high-mileage owners, and complicates resale
Warranty	Lifetime, unlimited-km battery warranty for first owner; 10yr/2,00,000km on resale	Standard vehicle warranty is only 3 years; SHIELD extended cover is a separate paid add-on
Interior & Tech	Triple 12.3" screen cockpit, Gemini-based TEQ_Talk assistant, semi-active suspension on top trims	Coupe-SUV roofline compresses rear headroom/legroom; some reviews describe rear seats as cramped
Cabin Comfort	Panoramic moonroof; wireless CarPlay/Android Auto now standard after an OTA update	Auto AC mode reportedly skips lower-body airflow; panoramic glass roof can heat the cabin faster in Indian summers
Charging	Fast DC charging (140-180 kW, 20 min for 20->80%); flexible AC home charging (7.2/11.2 kW)	Ex-showroom price excludes home wallbox + installation (~₹50,000-75,000); 180 kW charging network still thin outside major routes
Ownership Experience	Strong delivery ramp post-launch; broad variant/battery choice for different budgets	Waiting periods have historically ranged 2-10 months depending on variant, colour, and city
Value vs. Rivals	Beats Curvv EV and Creta Electric on outright range and power	Costs more than both at comparable trims; platform is new (2025-26) with limited reliability/resale history

9. Comparison vs. Key Rivals

Metric	Mahindra BE 6 SPORTEQ (base)	Tata Curvv EV	Hyundai Creta Electric
Starting Price (ex-showroom)	₹19.45 Lakh	₹17.49 Lakh	₹18.02 Lakh
Entry Battery	59 kWh	55 kWh	42 kWh
Entry Motor Power	228 bhp	165 bhp	Varies by pack

Metric	Mahindra BE 6 SPORTEQ (base)	Tata Curvv EV	Hyundai Creta Electric
Entry Torque	380 Nm	215 Nm	—
Entry ARAI Range	548 km	502 km	390 km (42 kWh) / 473 km (51.4 kWh)
0-100 km/h	6.7s (top 79 kWh pack)	8.5s	7.9s (Long Range variant)
Max Range (any pack)	682 km	502 km	473 km

Takeaway: The BE 6 SPORTEQ leads on outright range and power at every price point, but it also starts higher than both direct rivals. Buyers prioritizing price should cross-shop the Curvv EV and Creta Electric before committing to the BE 6's premium.

10. Which Variant Should You Buy?

Figure 2: Which SPORTEQ variant should you buy

Diagram: A decision flow guiding buyers from budget and priority (cost, comfort, ADAS, or flagship tech) to the recommended SPORTEQ trim.

11. Buyer's Due-Diligence Checklist

Before signing the booking form, verify the following:

1. **Real-world range expectations** — do not plan trips purely around the ARAI figure; independent reviews report meaningfully lower range at sustained highway speeds.
 2. **Rear-seat comfort** — sit in the back seat yourself if you'll regularly carry adult passengers; the coupe roofline compresses headroom/legroom.
 3. **BaaS math for your actual usage** — model your real daily/monthly km against the ₹3.75/km rental before assuming BaaS is cheaper long-term.
 4. **Extended warranty** — evaluate Mahindra's SHIELD plan at booking time; the standard vehicle warranty is only 3 years.
 5. **Hidden costs** — budget an additional ₹50,000–75,000 for a home wallbox charger and installation, on top of the ex-showroom price.
 6. **Current waiting period** — confirm with your dealer; historically 2–10 months depending on variant, colour, and city.
 7. **Software update status** — if buying a used/early unit, confirm the wireless CarPlay/Android Auto OTA update has been applied.
 8. **Charging infrastructure on your regular routes** — check DC fast-charging coverage (via the car's app or Mahindra's network map) for your typical long-distance drives before relying on it.
 9. **State EV subsidy eligibility** — incentive structures and price caps vary by state (Delhi, Maharashtra, Gujarat, etc.); confirm current eligibility for your chosen variant's price before assuming a subsidy applies.
-

Appendix A: Glossary of Terms

Term	Definition
ARAI	Automotive Research Association of India — the body issuing official certified range/efficiency figures
BaaS	Battery-as-a-Service — an ownership model where the battery is rented separately from the vehicle
INGLO	Mahindra's dedicated "born-electric" vehicle platform underpinning the BE 6 and XEV 9e
kWh	Kilowatt-hour — unit of battery energy capacity
PS / bhp	Power units; 1 PS is approximately 0.9863 bhp — near-identical but not exactly interchangeable

Term	Definition
DC Fast Charging	High-power charging (kW) delivered as direct current, used for rapid top-ups at public stations
ADAS	Advanced Driver Assistance Systems (e.g. Level 2: lane-keep assist, adaptive cruise control)
TPMS	Tyre Pressure Monitoring System
SHIELD	Mahindra's paid extended warranty program

Appendix B: Sources & Methodology

This report compiles data from the project's research files (mahindra_be6_research.md, mahindra_be6_pricing.csv, mahindra_be6_pros_cons.csv, SPORTEQ_Variants_2026.md), cross-verified against public automotive press coverage (Autocar India, CarDekho, Wikipedia, Team-BHP, ZigWheels, CarWale, and Mahindra's own press releases) as of September 2026.

Two figures were corrected during research verification: * Vehicle height: corrected from 1,635 mm to the verified **1,627 mm**. * 70 kWh variant specs: corrected from 228 bhp / ~600 km to the verified **245 PS / 651 km ARAI**.

Disclaimer: Prices, specifications, and features are subject to change by Mahindra without notice. Always confirm current figures with an authorized dealer before making a purchase decision.
